

Highlights

Global	Global risk sentiments remained fragile amid the brewing trade tensions, with the Dow suffering more than 1,400 points last week amid investor anxiety over China's potential retaliatory moves. US Treasury Secretary Mnuchin said "we're having very productive conversations with them" and "I'm cautiously hopeful we reach an agreement" with China. Although it's a shortened holiday week ahead with Easter holidays, nevertheless, expect Asian bourses to remain handicapped by ongoing concerns of a trade war and an impending deluge of US\$294b of UST bills and bonds this week. The positive news flow on the sidelines were that the US and South Korea had reached a bilateral trade agreement, as well as Spain's sovereign credit rating upgrade by S&P by one notch to A- on a "continuously strong economic performance". Today's economic data calendar is relatively light and comprises of US' Chicago Fed national activity index and Dallas Fed manufacturing activity index, and S'pore's Feb industrial production (our forecast: 0.4% yoy and -11.1% mom sa). Speakers include ECB's Weidmann and Nouy, Fed's Dudley, Mester and Quarles. BOT is also meeting on Wed but is likely to keep its policy rate unchanged at 1.5%.
US	Durable goods orders jumped 3.1% in Feb, after a revised 3.5% decline in Jan, while the orders excluding transportation also recovered 1.2%, suggesting that business investments had improved. Meanwhile, new home sales fell 0.6% mom to 618k in Feb, following a 4.7% decline in Jan (albeit this was revised up from a previous estimate of -7.8%) amid the expectations of reduced mortgage deductions due to tax law changes.
NZ	RBNZ's incoming governor Adrian Orr has signed a new Policy Targets Agreement that will explicitly aim for "maximum sustainable employment" in addition to containing inflation in a 1-3% range over the medium term.
SG	Headline inflation rebounded from 0% yoy (-0.2% mom nsa) in Jan to 0.5% yoy (+0.5% mom nsa) in Feb, while core inflation accelerated from 1.4% yoy to 1.7% yoy. Despite the pickup in price pressures, partly attributable to CNY timing, this may not sway MAS on the monetary policy front as inflation prints remain within the official forecast ranges for now.
CH	Although the plan announced by Premier Li shows soft approach remains the top option for China to ease the tension, it is also preparing for the worst. The Commerce Ministry announced to suspend the tariff concession for 128 US products worth US\$3bn in reaction to the steel and aluminium tariff from the section 232 investigation. China may announce more pending products on the detailed lists from the USTR under the section 301 investigation. Whether China will target the soybean imports from the US remains to be seen.
CMD	Market-watchers shrugged off news over higher US oil rig counts last week, focusing on John Bolton's appointment as national security adviser and the speculation that sanctions could be re-imposed on Iran. Oil surged another 2+% over the weekend, while net-long positions reported by CFTC rose by the most since mid-January 2018. Similar gains however, were not reflected on other growth-related commodities such as base metals and softs, suggesting that risk-off sentiments from last week's trade war woes are likely still being felt. Closer to Asia, a strong crude palm oil supply outlook into 2Q18 continues to drag prices. Note Malaysia's first 20 days of CPO production is seen at +5.8% m/m, according to MPOB.

Major Market

- **US:** Equities suffered one of their worst weeks following a series of unfortunate events that continue to shake the markets, signalling mounting concerns over factors ranging from rising trade protectionism to higher interest rates. The Dow, S&P 500 and the Nasdaq Composite all fell 1.77%, 2.10% and 2.43%, respectively. VIX stood at 24.87, compared to 23.34 previously. Expect equity weakness to persist on the back of mounting concerns over an impending trade war and how it could weigh on global economic growth.
- Meanwhile, US Treasury continued to rally. The 2y benchmark yield fell to 2.254% while the 10y yield fell to 2.814%.
- **Singapore:** The STI tanked 2.0% to close at 3421.39 on Friday and may attempt to stabilise today on some bargain hunting, notwithstanding Wall Street's Friday extended sell-off. With the ongoing flight to safety in UST bonds, SGS bond yields may also tread lower today.
- **Malaysia:** Central Bank Governor Muhammad Ibrahim has warned against taking the recent MYR appreciation and stability for granted. He was noted as saying that the rapid decline in oil prices, drastic disruptive policy shifts in major economies and trade tensions are prime examples of tail-risk events that could affect the currency. Without doubt, external factors would play the biggest part in determining the MYR value given that Malaysia is a small open economy. Due to this and the high probability that the MYR has recently been driven by USD weaknesses, we would have to continue to pay close attention to the ongoing uncertainty of the Trump administration with regards to the MYR value.
- **Indonesia:** Planning Minister Bambang Brodjonegoro has expressed concerns that a trade war between China and the USA could result in a worsening trade deficit for Indonesia as he fears Chinese exports could be diverted to Indonesia instead. Meanwhile, BI has noted that it has been ever present in the markets since Friday morning as it seeks to manage IDR volatility. The IDR has been mainly affected by external factors although economic fundamentals should eventually drive a stronger IDR.
- **Macau:** Visitor arrivals increased to the highest level since August 2014 at 3.07 million in February 2018, due to the effect of Lunar New Year Holiday. By country of residence, the number of visitors from Mainland China increased by 37% yoy, mainly led by a 51% yoy growth in same-day visitors. In contrast, visitors from Hong Kong only increased by 0.1% yoy while those from Taiwan, Japan and South Korea even dropped by 8.4% yoy, 26.4% yoy and 13.4% yoy respectively. The increase in visitor arrivals will likely slow down from February's 23% yoy in the coming month as calendar effect abates. However, we do not expect the tourism sector to lose momentum. Rather, infrastructure improvement and a new wave of mega project openings are expected to lend some support to the tourism activities. A weaker MOP and strong growth of Asia could also boost the tourism sector. If this is the case, mass-market segment of the gaming sector may remain elevated throughout this year.

Bond Market Updates

- **Market Commentary:** The SGD swap curve largely flattened last Friday, with the swap rates for the shorter tenors trading 1bps lower while the longer tenors traded 1-2bps lower, with the exception of the 20Y trading 2bps higher. In the broader dollar space, the Bloomberg Barclays Asia USD IG Bond Index average OAS widened 1bps to 122bps while the Bloomberg Barclays Asia USD HY Bond Index average OAS widened 7bps to 373bps. 10Y UST yield fell 1bps last Friday to 2.81%, due to fears of potential global trade war, with Trump's decision to impose USD50bn tariff on China.
- **New issues:** Land Transport Authority of Singapore has priced a re-tap of its SGD300mn LTAZSP 3.35%'48s at 3.35%, in line with its initial price guidance.
