

## You run your business. Run this software and protect yourself.

**Protect your corporate account against fraud and cybercriminals – they are out there and trying to get in.**

**The Internet: Convenient for you, your business, and *for cybercriminals***

The Internet offers massive advantages, conveniences and opportunities. But with such access, comes new security risks.

The bank has taken exhaustive steps in the protection of information transmitted and processed when you use online banking.

For example, your bank safeguards confidential data that it sends over the Internet so that it is not retrieved or modified by unauthorised parties.

### **Where is the weak link on security?**

Despite these safeguards, your bank cannot directly protect you from certain risks.

Your bank cannot directly protect your computer, and cannot safeguard the way in which you use your computer.

Your computer and the applications you use can expose you to potential risks.

**Download IBM® Security Trusteer Rapport™. Know your account is protected.**

**You Don't Have Enough  
Online Security. But You Should.**

Malware and phishing allow cyber criminals to access your computer, corporate account numbers, and business information. It can take days or weeks to be detected but by then, it's too late.

Some of the Prestigious Awards Trusteer Rapport Has Received

**Trusteer Rapport Works  
Hard to Protect You.**

Works alongside your current security software, increasing your protection and decreasing your susceptibility to criminal behavior, protecting you and your business from threats your antivirus cannot. Trusteer Rapport verifies that you're connected to your bank's actual website and creates a secure line of communication.

**3rd PARTY ASSESSMENT**

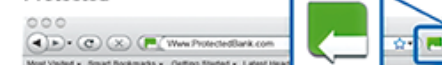

**Trusteer Rapport Proven  
Effective Against Advanced  
Financial Malware**

**Easy to Use.  
Won't Slow You Down.**

Trusteer Rapport takes just minutes to download and install. It runs in the background so your computer tasks continue completely uninterrupted. Once installed, a small Trusteer Rapport icon will appear next to your browser's address bar, changing color to let you know when it's working.
