Fed chair Yellen's testimony came across with a clearly cautious tone but was a tad less dovish than what market had been anticipating. She was less upbeat on the economic assessment, citing that "the economic outlook is uncertain" and "foreign economic developments, in particular, pose risks to U.S. economic growth", of which "although recent economic indicators do not suggest a sharp slowdown in Chinese growth, declines in the foreign exchange value of the renminbi have intensified uncertainty about China's exchange rate policy and the prospects for its economy". In turn, "this uncertainty led to increased volatility in global financial markets and, against the background of persistent weakness abroad, exacerbated concerns about the outlook for global growth" and "should any of these downside risks materialize, foreign activity and demand for U.S. exports could weaken and financial market conditions could tighten further".

Second, she was also concerned about tightening financial conditions, but still expects gradual adjustments in monetary policy. She noted that "financial conditions in the United States have recently become less supportive of growth, with declines in broad measures of equity prices, higher borrowing rates for riskier borrowers, and a further appreciation of the dollar" and "these developments, if they prove persistent, could weigh on the outlook for economic activity and the labour market". However, she opined that "ongoing employment gains and faster wage growth should support the growth of real incomes and therefore consumer spending, and global economic growth should pick up over time, supported by highly accommodative monetary policies abroad" and concluded that "against this backdrop, the Committee expects that with gradual adjustments in the stance of monetary policy, economic activity will expand at a moderate pace in coming years and that labour market indicators will continue to strengthen".

Elsewhere, crude oil prices slid further despite a surprise decline in crude supplies reported by EIA. On tap today is a light economic data calendar including US' initial jobless claims, BSP rate decision (likely unchanged at 4%) and Malaysia's industrial production, given that China, Taiwan and Japanese markets are closed.

On negative rates, Yellen was non-committal, indicating "that remains a question that we still would need to investigate more thoroughly", but "I do not expect that the FOMC is going to be soon in the situation where it's necessary to cut rates".

The CBI cut the UK's 2016 growth outlook from 2.6+% to 2.3% and also trimmed its 2017 forecast to 2.1% (previously 2.4%), citing that "while there's little current evidence of uncertainty negatively affecting business investment ahead of the EU referendum, this is a potential risk to the UK's solid economic outlook".

Changi Airport saw 2.6% yoy growth to 55.4 million passengers in 2015, with Indian fliers accounting for 3.44 million to stay its 7th largest country market.

With the USD continuing to soften in Asia on Wednesday, our 04 Feb 16 idea to be tactically short USD-SGD (spot ref: 1.4158) reached its 1.3915 objective. Ahead of Yellen's testimony to the House Financial Services committee, we extend our target to 1.3680, trailing the stop to 1.4035.

Major Market

- **US:** Wall Street ended mixed overnight despite initial gains, with the Dow -0.62%, S&P500 -0.02% and Nasdaq +0.35%. VIX -0.94% to 26.29. The UST bond market ended with the 2- and 10-year bond yields at 0.69% and 1.67% (-6bps) respectively, amid strong demand for the \$23b new 10-year bond auction which fetched a 1.73% yield (lowest since 2012) and indirect bidding of 62.3% (third highest on record), albeit the bid-cover ratio was the lowest since Aug at 2.56x. The 2-10 yield curve flattened to 98bps, the narrowest since Dec 2007.
- **Singapore:** The STI saw a poor start after re-opening from the CNY holidays and slid 1.57% to close at 2582.10 yesterday. Given mixed leads from Wall Street overnight and a soft tone in Kospi this morning, the STI may remain trapped in a lacklustre range between 2540-2600 today. The SGS bond yield curve is likely to trade with a supportive tone given the still cautious investor mood, especially with STI resuming its downward trajectory.

Bond Market Updates

- Market Commentary: The SGD swap curve traded bull-flattened yesterday, with the shorter-end
 rates trading 4bps-6bps lower while the longer-end rates traded 8bps-10bps lower. IG credits were
 unchanged with the iTraxx Asia ex-Japan IG index at 165bps. The 10y UST yield fell by 6bps to
 1.66% following Chair Yellen's slightly downbeat comments on the US economic outlook.
- Rating Changes: Moody's downgraded Toshiba Corp's ratings to "B2" from "Ba2", reflecting Moody's deepening concern over the sustainability of Toshiba's near-term liquidity situation and its ability to maintain positive internal cash flow following its own successive downward earnings revision. The ratings remain under review for downgrade. Moody's upgraded Mitsubishi UFJ Financial Group, Inc. ("MUFG") issuer rating to "A1" from "A2", representing Moody's preliminary credit opinions in advance of the final sale of securities by MUFG. Outlook is stable.
