Highlights

<u>ə</u>	ingrits
Global	Market sentiment appears to have grown more cautious given news about sizable stockmarket drops in China and Hong Kong yesterday. Concerns about money market squeeze arose, with 3-month HIBOR jumping by 10bp to 0.82% yesterday, in part due to a build-up in expectations about Fed funds rate hike for this week and into next year. On the mainland, government bonds continue to see their yields picking up, with 10yr yield inching close to 3.2%, compared to less than 2.75% before US presidential elections.
SN	Equities ended mixed on Monday, as the S&P 500 and Nasdaq slipped 0.11% and 0.59% respectively. Losses were led by financials, while early gains in energy stocks moderated alongside crude price movements. The Dow, driven by gains in Pfizer and Exxon, bucked trend to gain 0.20%. VIX rose to 12.64, up 7.6%. Monday also saw two auctions, totaling US\$44b, of new 3- and 10-year US Treasuries, yielding 1.452% and 2.485% respectively. Benchmark 10-year yields traded above 2.5%, highest since Sep 2014, before easing to close at 2.47%. 2-year yields were up 1 bp to 1.14%.
SG	Business confidence reportedly slumped to its most pessimistic reading in a year, according to Singapore Commercial Credit Bureau (SCCB)'s quarterly Business Optimism Index (BOI). The index fell to 1.22 percentage points in 1Q17, from a 2.87 percentage point in 4Q16. Both wholesale trade and financial services sectors emerged as the most pessimistic sectors for the upcoming quarter, while tourism emerged as the most optimistic industry. STI remained flat (-0.13%) and closed at 2,951.19, suggesting that market watchers were waiting for more concrete cues from the upcoming FOMC meeting happening later this week. With a relatively quiet week till then, do expect STI to range-bound in a tight range. Gainers included energy names such as Keppel (+5.9%), Sembcorp Industries (+2.75%) and palm oil giant Wilmar (+2.22%), though losses seen in Genting Singapore (-2.55%) and Hong Kong Land Holdings (-2.46%) limited overall gains.
СН	Both equity and bond markets were sold off sharply on Monday for different reasons. The correction in equity market was mainly triggered by CSRC's comments about aggressive acquisition by asset managers while the weak sentiment in the bond market was the result of expectations on tightening bias from PBoC.
MA	Bank Negara's Financial Markets Committee issued a statement on Friday saying that the recent measures to stabilize the ringgit have had encouraging results. It stated, for instance, that the average intra-day movement in the exchange rate has declined from 228 points in November to 68 points in December. It added that the onshore forex market recorded daily average volume of USD8.3bn, and that transactions in the bond market were also healthy with an average daily volume of MYR4.5bn.
Commodities	Crude oil prices moved sideways after touching as high as \$57/bbl yesterday morning, as investors cheered on the recent agreement between OPEC and non-OPEC, before closing at \$52.83/bbl and \$55.69/bbl for WTI and Brent, respectively. Into the week ahead, no major news save for the upcoming FOMC meeting is noteworthy; we continue to look for a 25bps rate hike later this week, with gold prices trending around \$1,160/oz.

Major Market

• Macau: The rebound in gaming revenue's shored up housing market sentiment further, which allowed the new residential projects to lure more home buyers. In the secondary market, even though sellers raised the asking prices amid market recovery, prospective buyers still showed huge interests. As a result, housing transaction volume edged up at its fastest pace since Nov 2012 by 140.5% yoy to 1022 units in October. In the same month, average housing price jumped 12.7% yoy to MOP89430/sq. m. while new mortgage loans approved rose further by 16.3% yoy to MOP2.87 billion. Looking ahead, the Fed's faster rate hike pace, tighter rules on junket operators, stagnant wage growth and cooling measures together signal that the recent pick-up in demand may be unsustainable. Combined with increasing supply, the stabilization of housing market may come to an end next year. Housing prices and transaction volume are expected to oscillate around their current levels in the coming quarter while we will see moderate downward risks over the rest of 2017.

Bond Market Updates

- Market Commentary: The SGD swap curve bear-steepened yesterday as swap rates traded 3-12bps higher across all tenors. In the broader dollar space, the spread on JACI IG corporates remained relatively unchanged at 199bps while the yield on JACI HY corporates increased 3bps to 6.94%. 10y UST yields were steady at 2.47% but traded as high as 2.52% mid-day on the back of higher oil prices that triggered a global bond sell-off.
- New Issues: BOCOM Financial Leasing priced a two-tranche deal yesterday with the USD150mn 5year bond priced at 3.5% while the other tranche of USD150mn 7-year bonds were priced at 4.5%. The expected issue ratings are "A2/NR/NR".
- Rating Changes: S&P downgraded Dalian Wanda Commercial Properties Co. Ltd.'s (Wanda) corporate credit rating to "BBB-" from "BBB" with a negative outlook. At the same time, the corporate credit rating on Wanda Commercial Properties (Hong Kong) Co. Ltd. was downgraded to "BB+" from "BBB-". The outlook is negative. The downgrades reflect the deterioration in Wanda's leverage and expectation that it will remain elevated over the next two years due to slow execution of its asset-light strategy and increased capital expenditure. Moody's affirmed the "Baa2" issue rating on Far East Hospitality Trust and revised its outlook to negative from stable. The revision reflects the weakening of the company's financial profile due to lower earnings.

This publication is solely for information purposes only and may not be published, circulated, reproduced or distributed in whole or in part to any other person without our prior written consent. This publication should not be construed as an offer or solicitation for the subscription, purchase or sale of the securities/instruments mentioned herein. Any forecast on the economy, stock market, bond market and economic trends of the markets provided is not necessarily indicative of the future or likely performance of the securities/instruments. Whilst the information contained herein has been compiled from sources believed to be reliable and we have taken all reasonable care to ensure that the information contained in this publication is not untrue or misleading at the time of publication, we cannot guarantee and we make no representation as to its accuracy or completeness, and you should not act on it without first independently verifying its contents. The securities/instruments mentioned in this publication may not be suitable for investment by all investors. Any opinion or estimate contained in this report is subject to change without notice. We have not given any consideration to and we have not made any investigation of the investment objectives, financial situation or particular needs of the recipient or any class of persons, and accordingly, no warranty whatsoever is given and no liability whatsoever is accepted for any loss arising whether directly or indirectly as a result of the recipient or any class of persons acting on such information or opinion or estimate. This publication may cover a wide range of topics and is not intended to be a comprehensive study or to provide any recommendation or advice on personal investing or financial planning. Accordingly, they should not be relied on or treated as a substitute for specific advice concerning individual situations. Please seek advice from a financial adviser regarding the suitability of any investment product taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. OCBC and/or its related and affiliated corporations may at any time make markets in the securities/instruments mentioned in this publication and together with their respective directors and officers, may have or take positions in the securities/instruments mentioned in this publication and may be engaged in purchasing or selling the same for themselves or their clients, and may also perform or seek to perform broking and other investment or securitiesrelated services for the corporations whose securities are mentioned in this publication as well as other parties generally.
