

## Highlights

Global	<p>The Trump trade continued to unwind ahead of his presidential inauguration ceremony today, as he takes office with the US economy in full bloom. The Dow closed lower for the fifth consecutive session and US Treasury bond yields higher, albeit the USD took advantage of the dovish ECB rhetoric. Elsewhere, ECB, BI and BNM were expectedly static but ECB president Draghi's dovish tone (need for a "very substantial degree of monetary accommodation" helped ease tapering fears)</p> <p>Apart from China's 4Q16 GDP (expected to print 6.7%) and Dec industrial production/retail sales/FAI data prints, there is little else on the economic data front that will occupy investors' attention. Watch Trump's inauguration speech (a potential wildcard but hopefully with more economic policy intentions than his previous news conference – note US Treasury Secretary nominee Mnuchin had said during his Senate confirmation hearing that he would label China as a currency manipulator and that Trump's comments as the USD being "too strong" was referring to the short-term) and Fed chair Yellen's speech.</p>
US	<p>Initial jobless claims fell 15k to 234k (low since mid-Nov), bringing the 4-week average to 247k, while continuing claims also dipped to 2.046m, suggesting that the labour market is likely to remain robust. Meanwhile, the Philadelphia Fed business index unexpectedly strengthened from 21.5 in Dec to 23.6 (highest since Nov14) in Jan, with the workweek and number of employee gauges both healthy. The forward-looking six months ahead index also surged from 48.7 to 56.6 in Jan (highest since Aug14), and reflecting sustained optimism. Housing starts rebounded more than expected by 11.3% mom to 1.226m in Dec, after a revised 16.5% decline in Nov, led by higher apartment construction that capped the 7<sup>th</sup> straight year of increase.</p>
EZ	<p>ECB's Draghi opined that "it's increasingly clear that this policy stance has been successful", but reiterated that inflation pressures remain subdued and he does not see a convincing uptrend. Meanwhile, German finance minister Schaeuble suggested inflation is likely to rise up to 2%.</p>
ID	<p>Bank Indonesia decided to keep its 7-day reverse repo policy rate at 4.75% yesterday, in line with our expectation and that of the market. BI highlighted lingering global risk factors in the decision while also alluding to a likely pick-up in inflation this year due to increases in administered prices.</p>
MA	<p>Bank Negara kept its overnight policy rate unchanged at 3% yesterday, as market expected. Even as it continues to highlight downside risks to growth due to global uncertainties, a recent upturn in some indicators including exports has allowed the central bank to breathe more easily.</p>
Commodities	<p>Crude oil erased some of its losses yesterday on lower oil inventories seen in US Cushing, although total US oil inventories gained 2.3 million barrels. Still, the surge in gasoline inventories by 6.0 million barrels did drag gasoline futures by 0.92% to \$1.5345/gallon, the lowest since mid-December 2016. Gold fell below its \$1,200/oz on intraday trading yesterday, as investors digested Yellen's rhetoric that it "makes sense" to reduce monetary accommodation, amid a better-than-expected US initial jobless claims at 234k vs expectation 252k.</p>

## Major Markets

- **Singapore:** The STI added 0.27% yesterday to close at 3008.22 yesterday, and it remains to be seen if it can continue to sustain above the 3000 handle today amid the sea of red ink spreading across the global equity bourses. STI resistance is tipped at 3020. With the overnight UST bond sell-off and steepening bias, the SGS curve may be tempted to follow suit today. The upcoming 2-year SGS bond re-opening on 26 Jan will be \$2.3b in size with MAS taking \$200m.
- **Hong Kong:** The improvement in economy due to China's stabilization and optimism about global recovery has supported the labour market. Employment and labour force grew by 0.8% and 0.9% respectively on yearly basis over 2016. The seasonally adjusted unemployment rate held stable at 3.3% in 4Q 2016. The major sectors also saw decrease in their unemployment rate. Jobless rate of the trade and wholesale sector and that of the retail, accommodation and food services sector dropped to 2.7% and 4.9% from 2.9% and 5.2% in 4Q respectively. This was attributed to the two sectors' moderate rebound in the quarter. In addition, with the launch of the second stock link, the resultant increase in labour demand pushed the financial sector's unemployment rate down to 2.4%, the lowest since September 2015. The resilient labour market would have warranted a moderate economic growth in 4Q. However, downward risks to the labor market have yet to be eliminated as global uncertainty looms.
- **Korea:** BOK board member Cho Dong-chui commented that the central bank has room to cut rates further if growth or inflation outlook deteriorates.

## Bond Market Updates

- **Market Commentary:** The SGD swap curve traded higher across all tenors, with swap rates rising by 3-4bps at the shorter end of the curve and 4-5bps at the middle and longer end of the curve. In the broader dollar space, the spread on JACI IG Corporates fell 3bps to 195bps, while the yield on JACI HY Corporates rose 4bps to 6.81%. 10y UST yields rose 4bps yesterday to 2.47%, following Philadelphia Fed Business Outlook index that beat expectations.
- **New Issues:** Huaxing Investment Holding Company Ltd. is planning to issue USD 3-year bonds (guaranteed by Zhuhai Huafa Group Co.). The expected issue ratings are 'NR/NR/BBB'. China Water Affairs Group Ltd. is also proposing to issue USD Senior Notes. PB International B.V. set final guidance for its USD 5NC3 bond (guaranteed by PT Pan Brothers Tbk.) at 7.75%, with the issue size capped at USD200mn. The expected issue ratings are 'NR/B1/B'.
- **Rating Changes:** S&P revised Fufeng Group Ltd.'s 'BB+' corporate credit rating outlook to positive from stable. The rating action reflects S&P's expectations that Fufeng will improve its profitability over the next 12-24 months despite operating in a maturing industry. Moody's upgraded China Guangfa Bank Co. Ltd.'s (CGB) foreign currency deposit ratings to 'Baa3' from 'Ba1'. In addition, Moody's affirmed the bank's baseline credit assessment (BCA) at 'Ba3', upgraded its adjusted BCA to 'Ba1' from 'Ba3', and upgraded its counterparty risk assessment to 'Baa2(cr)' from 'Ba1(cr)', all with stable outlooks. The bank's 'Baa3' rating reflects its standalone BCA of 'Ba3' and three notches uplift due to increasing external support. In particular, Moody's has incorporated two notches of affiliate support and one notch of government support in the bank's long-term deposit rating. Moody's has upgraded Fortescue Metals Group Ltd's corporate family rating (CFR) to 'Ba1' from 'Ba2'. In addition, Moody's upgraded the senior unsecured and senior secured ratings of FMG Resources (August 2006) Pty Ltd to 'Ba2' and 'Baa3' from 'B1' and 'Ba1' respectively. The rating outlook is stable. The upgrade to Fortescue's ratings reflects 1) the substantial debt reduction the company has undertaken over the last several years and most recently in December 2016; 2) the

continued and sustained cost improvements which have created an earnings buffer to lower iron ore prices; 3) limited near term capital expenditures, which supports free cash flow generation; and 4) the reduced refinancing risk and reduction in secured debt. Moody's affirmed Incitec Pivot Ltd.'s 'Baa3' issuer, 'Baa3' senior unsecured debt rating and '(P)Baa3' senior unsecured MTN ratings. In addition, Moody's changed the rating outlook to positive from stable. The change in outlook to positive reflects the completion of the company's ammonia plant in Waggaman, Louisiana (WALA) and the continued execution on its cost improvement initiatives. Moody's affirmed Tokio Marine & Nichido Fire Insurance Co. Ltd.'s (Tokio Marine) 'Aa3' insurance financial strength rating. In addition, Moody has changed the rating outlook to stable from negative. The change in the rating outlook to stable reflects: (1) the company's improved profitability; (2) its improving capital base, after the reduction in its capital due to the acquisition of HCC Insurance Holdings, Inc.; and (3) Tokio Marine's good management of HCC's business including the risk management of HCC's specialty lines business. Fitch affirmed China Development Bank Corporation's (CDB), Agricultural Development Bank of China's (ADBC) and Export-Import Bank of China's (Exim) issuer default rating at 'A+', with stable outlooks. The rating actions are based on an extremely high probability of the central government supporting the banks in a timely manner in the event of stress.

Any forecast on the economy, stock market, bond market and economic trends of the markets provided is not necessarily indicative of the future or likely performance of the securities/instruments. Whilst the information contained herein has been compiled from sources believed to be reliable and we have taken all reasonable care to ensure that the information contained in this publication is not untrue or misleading at the time of publication, we cannot guarantee and we make no representation as to its accuracy or completeness, and you should not act on it without first independently verifying its contents. The securities/instruments mentioned in this publication may not be suitable for investment by all investors. Any opinion or estimate contained in this report is subject to change without notice. We have not given any consideration to and we have not made any investigation of the investment objectives, financial situation or particular needs of the recipient or any class of persons, and accordingly, no warranty whatsoever is given and no liability whatsoever is accepted for any loss arising whether directly or indirectly as a result of the recipient or any class of persons acting on such information or opinion or estimate. This publication may cover a wide range of topics and is not intended to be a comprehensive study or to provide any recommendation or advice on personal investing or financial planning. Accordingly, they should not be relied on or treated as a substitute for specific advice concerning individual situations. Please seek advice from a financial adviser regarding the suitability of any investment product taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. OCBC and/or its related and affiliated corporations may at any time make markets in the securities/instruments mentioned in this publication and together with their respective directors and officers, may have or take positions in the securities/instruments mentioned in this publication and may be engaged in purchasing or selling the same for themselves or their clients, and may also perform or seek to perform broking and other investment or securities-related services for the corporations whose securities are mentioned in this publication as well as other parties generally.
