

## Highlights

<b>Global</b>	<p>Global risk appetite was buoyant overnight following US' manufacturing ISM data, but Moody's cut for China's outlook from stable to negative with the Aa3 rating unchanged may cast a shadow over Asia today. Note global manufacturing PMI cues remained lacklustre – China's official and Caixin manufacturing PMIs both deteriorated more than expected to 49.0 and 48.0 in February, down from 49.4 and 48.4 previously, while its counterparts in the rest of Asia also generally softened across the board, albeit the Chinese New Year festive season in February may have been a contributing factor. Taiwan slipped into contraction territory from 50.6 to 49.4, while Indonesia (from 48.9 to 48.7) and Malaysia (from 48.6 to 47.8) lagged. India was unchanged at 51.1 while Vietnam also held above the key 50 handle (50.3 versus 51.5 previously). In DM, UK's Markit PMI also fell below expectations from 52.9 to 50.8, the worst since April 2013, as new orders barely rose and employment fell for a second month, with price pressures firmly on the downside due to commodity prices, albeit it did not fully reflect the GBP's fall or Brexit risks. The Euro-area's PMI slid from 52.3 to 51.2, with the price gauge falling below the key 50 level to its lowest since June 2013 and suggesting continued deflationary pressures. US' manufacturing ISM beat expectations, rising from 48.2 in Jan to 49.5 in Feb, the highest since Sep, albeit still in contraction territory, as new orders and employment climbing to 51.5 and 48.5 from 51.5 and 45.9 respectively, suggesting a possible bottom. For today, watch for US' Beige Book, ADP employment and New York ISM, Eurozone's PPI, Singapore's manufacturing and electronics PMI as well as COE premium tender results, and the US presidential primary results.</p>
<b>Australia</b>	<p>RBA kept its cash target rate steady at 2% for the 10th consecutive month as widely anticipated, with governor Stevens indicating that "continued low inflation would provide scope for easier policy, should that be appropriate to lend support to demand". The statement noted that "new information should allow the Board to judge whether the improvement in labour market conditions is continuing and whether the recent financial turbulence portends weaker global and domestic demand".</p>
<b>SG</b>	<p>The manufacturing and electronics PMI may hopefully show signs of stabilisation around the Jan readings of 49.0 and 48.5, but is likely to stay in the contraction territory at this juncture given very weak business sentiments.</p>
<b>China</b>	<p>China suspended its open market operation yesterday due to ample liquidity in the interbank system after PBoC unfroze about CNY650billion in liquidity via the RRR cut. Feb's PMI also fell to 49 from Jan's 49.4, signalling that activity is still weak. However, the data may also be distorted by the Chinese New Year. Historical data show that PMI in the lunar new year month tends to fall due to closure of factories during the holiday season. As such, we may need to wait for more data to gauge the healthiness of Chinese economy.</p>
<b>Commodities</b>	<p>Energy prices jumped overnight, with WTI and Brent clocking their second consecutive day of increase. More starkly perhaps, is the surge in gasoline futures to \$1.30/gallon (+24.2%) overnight, after touching its 2016 low of \$1.13/gallon. The surge is partly due to some planned shutdowns in oil refineries earlier in January, while in part also due to the pick-up in oil prices of late.</p>

## Major Market

- **US:** Construction spending accelerated from a revised +0.6% mom gain in Dec to +1.5% in Jan amid more government-funded highway and street projects. The IBD/TIPP economic optimism softened a tad from 47.8 in Feb to 46.8 in Mar, whereas the Markit manufacturing PMI was revised to 51.3 for Feb.
- Wall Street recovered strongly yesterday as investor took heart from the manufacturing ISM data, with the Dow +2.11%, S&P500 +2.39% and Nasdaq +2.89%. VIX -13.87% to 17.70. The UST bond market saw the largest tumble in three months amid manufacturing optimism, driving up the 2- and 10-year bond yields at 0.85% (+7bps to the highest since 26 Jan) and 1.83% (+9bps) respectively.
- **Europe:** German unemployment fell by 10k in Feb, but the Markit/BME manufacturing was revised to 50.5. ECB's Draghi said that "work is being carried out to ensure that all the technical conditions are in place to make the full range of policy options available for implementation, if needed" as "euro-area inflation dynamics continue to be weaker than expected" ahead of 10 March meeting.
- **Singapore:** The STI extended another 0.60% to close at 2682.39 yesterday. Given the overnight Wall Street surge and morning gains in Kospi, the STI could stage a further climb towards the 2700 resistance today, with support at 2660. SGS bonds could trade lower following the overnight selloff in UST bond market.
- **Macau:** Gross gaming revenue declined for the 21 straight months in February, the longest stretch on record, coming in at MOP19.52 billion. Nevertheless, the annual decrease narrowed to 0.1% while headline figures posted its third consecutive monthly growth, ticking up 4.5% mom thanks to effect of the festive season. However, as the effect of the festive season fades, the annual decrease of gaming revenue is expected to worsen again in the coming months.
- **Indonesia:** February inflation was at 4.42%yoy, a tad above market expectation of 4.36% and January's 4.14%, brought on by a sequential uptick in the prices of processed food and clothing.
- **Malaysia:** Petronas, the state-owned oil and gas company, has reportedly said that it planned to cut about 1000 jobs as it battles the impact of low crude prices. This comes after a revamp of its organizational structure and announcement that it may raise money and dip into its cash reserves to pay out dividends to the government.
- **Thailand:** Headline inflation fell 0.50% in line with our expectation, although core inflation growth rose stronger by 0.68% (vs OCBC: +0.60%). The drag in domestic prices are once again dragged by lower energy prices (-12.5%), and transportation (-4.8%), though higher food prices limited the overall fall. Note that the drought in Thailand has reportedly left dam levels low, while some farmers highlighted her intent to cease farming due to water shortage.

## Bond Market Updates

- **Market Commentary:** The SGD swap curve traded 2bps-3bps lower yesterday across the curve. In the broader dollar space, JACI IG corporates spread was level at 251bps, while the yield on the JACI HY corporates decreased by 3bps to 8.12%. The 10y UST increased by 9bps to 1.82%.
- **New Issues:** Sumitomo Mitsui FG has scheduled for investor meetings for a 5-year or 10-year USD bond issue. The expected ratings for the bond issue are "A/A1/NR".
- **Rating Changes:** Moody's downgraded Sime Darby Bhd and Sime Darby Global Bhd ratings to "Baa1" from "A3". This is due to the extended period of weakness evident in Sime Darby's financial

profile after it delayed plans to reduce its debt, while cash generation is deteriorating across its key plantation, industrial and motors segments due to the tough operating environment. Outlook is negative. Moody's also downgraded CITIC Resources Holdings Ltd long-term corporate family rating to "B1" from "Ba3", due to a decline in credit and cash positions due to lower prices for oil, metal and coal. Outlook is negative. Meanwhile, Fitch has downgraded China Fishery Group Ltd to "Restricted Default" from a previous rating of "C" after they have failed to pay a semi-annual coupon when the 30-day grace period expired on 29 February 2016. The Singapore-listed stock is currently still suspended from trading.
