**Highlights**

<b>Global</b>	<p>Global risk appetite continued to sustain on Friday, as investors digested a more dovish FOMC slant, albeit crude oil prices eased. The US' University of Michigan sentiments unexpectedly retreated from 91.7 to a 5-month low of 90.0 (forecast: 92.2), as current conditions and expectations gauges both softened to 105.6 and 80.0 (low since Sep15) in Mar, although the 1-year and 5-10 year inflation expectations gauges recovered from 2.5% to 2.7% which suggests that households are not expecting low inflation to persist over the medium term.</p> <p>With Japan out for holiday today, today's data calendar is also light with only the US' existing home sales and Chicago Fed national activity index in focus. For this week, key central bank meetings to watch include BOT (likely static at 1.5%) and BSP (also expected to be on hold at 4%) on 23 Mar, but CBC may trim its benchmark interest rate by another 12.5bps to 1.5% on 24 Mar. Comments from the Boao Forum in Hainan on 24 Mar may also draw some market attention, whilst Singapore announces its FY16 Budget on 24 Mar too.</p>
<b>US</b>	Fed's Bullard opined that "prudent policy suggests edging the policy rate and the balance sheet toward more normal levels" and "while the FOMC's goals have been met, the FOMC's policy settings remain extreme".
<b>EZ</b>	ECB's Praet opined that the bank can still cut rates if necessary, while Weidmann has warned that "helicopter money isn't manna falling from heaven, but would rip huge holes in central bank balance sheets" and "the euro area states and taxpayers would pay the bill in the end". On ECB's recent policy easing, Weidmann also opined that "the effect of ultra-loose monetary policy gets weaker the longer it lasts" and "the more you put your foot on the gas, the bigger the risks and side effects become".
<b>AU</b>	PM Turnbull has brought forward the budget announcement by one week to 3 May and threatened to call an early election on 2 July unless the Senate passes legislation to regulate unions.
<b>SG</b>	MAS will announce the details of the 2-year SGS bond re-opening due 29 Mar.
<b>China</b>	PBoC Governor said yesterday that China's leverage ratio is relatively on the high side and acceleration of development of capital market is one of the ways to lower the leverage ratio via increasing the share of equity financing in national savings. Meanwhile, China revived the margin lending in the stock market. China Securities Finance Corp made an announcement to restart its offerings of loans to securities companies ranging from 7 days to 182 days with reduced interest rate. The borrowing cost for 182 days is only 3%. China's Finance Minister Lou Jiwei said he did not care that much about the latest credit rating outlook downgrade and said it has a limited impact.
<b>Indonesia</b>	BI's Governor, Agus Martowardojo, was quoted by Kompas daily as saying that the banking sector would take 1-3 months to pass on the policy rate cuts to lending rates as banks would need to lower their costs of fund first.
<b>Commodities</b>	The commodity complex fell across the board after the dollar rallied on Friday amid likely some profit-taking as well after the notable gains in the previous trading day. Crude oil fell below \$40/bbl once again, while the unexpected gain in US oil rigs, the first gain since late last year, could have spooked some market-watchers as well.

## Major Market

- **US:** Wall Street rallied on Friday, adding to a 5th straight week of gains, with the Dow +0.69%, S&P500 +0.44% (turning positive for the year-to-date) and Nasdaq +0.43%. Laggards like healthcare and financial shares rose. VIX -2.91% to 14.02. The UST bond market gained on Friday, with the 2- and 10-year bond yields at 0.84% and 1.88% respectively.
- **Singapore:** The STI rose 0.92% to close at 2906.80 on Friday, and may attempt to tick higher today given positive leads from Wall Street on Friday and modest morning gains by Kospi. STI could trade in a 2880-2920 range today. Meanwhile, SGS bonds may tread more lightly today, awaiting MAS' auction details for the 2-year SGS bond re-opening.
- **Thailand:** A tax incentive is said to be forwarded for cabinet approval in the coming weeks, to entice Thai consumers to spend in local retails during the upcoming Songkran festival.

## Bond Market Updates

- **Market Commentary:** The SGD swap curve traded 3bps lower last Friday. Flows in the SGD corporate space was heavy where we saw mixed interest in GENSSP 5.125%'49s, PREHSP 4.9%'19s, F 3.7%'19s, FCLSP 5%'49s, OOCLIN 4.1%'22s. There was also better buyers of ANVAU 5.5%'76s, and better sellers of ABNANB 4.7%'22s. In the broader dollar space, JACI IG corporates spread tightened by 2bps to 231bps, while the yield on the JACI HY corporates decreased by 3bps to 7.81%. 10y UST decreased by 2bps to 1.87%, with the market continuing to digest the relatively dovish FOMC statement.
- **New Issues:** Korea Development Bank priced a dual tranche USD floating rate note. The USD150mn 3-year tranche was priced at 3mL+85bps while the USD150mn 5-year tranche was priced at 3mL+95bps. The expected rating for the issue is "AA-/Aa2/AA-". UOB Ltd re-tapped the 3.5%'26s bond at CT10+213bps, tightening from an initial guidance of CT10+215bps. TMB Bank plans for a potential USD bond issue and has scheduled investor meetings in Hong Kong and Singapore today.
- **Rating Changes:** Moody's affirmed Tokyo Electric Power Company Inc. (TEPCO) "Ba3" corporate family rating, "Ba2" senior secured debt rating and "B1" issuer rating. Outlook is stable. Concurrently, Moody's has withdrawn TEPCO's "B1" issuer rating, in line with Moody's practice on other speculative grade issuers. The change in outlook reflects Moody's view that TEPCO's credit profile has shown a greater degree of stability. Moody's has concluded rating reviews for Thai Oil Public Co Ltd ("Thai Oil"), PTT Global Chemical Public Co Ltd ("PTTGC"), IRPC Public Co Ltd ("IRPC"). This follows a confirmation on the ratings of parent, PTT Public Co Ltd ("PTT") on 17 Mar 2016. As such,
  - Thai Oil's "Baa1" senior unsecured rating incorporates a one-notch uplift, based on the expected support from PTT.
  - PTTGC's "Baa2" rating incorporates a one-notch uplift, reflecting the likelihood of PTT providing credit support in the event of distress.
  - IRPC "Ba1" ratings incorporate a two-notch uplift that reflects PTT's willingness to provide additional working capital and extraordinary credit support in a situation of stress.
- Moody's placed Canon's "Aa1" rating on review for downgrade following Canon's announce of JPY665.5bn acquisition of Toshiba Medical Systems, due to the issuance of debt that will lead to pressure on Canon's financial profile. Moody's also confirmed Energi Mega Persada Tbk ("EMP") "B2" corporate family rating in light of its support by the increasing proportion of earnings and cash flows from stable gas producing blocks in Indonesia.

- S&P placed Manulife Japan “AA-“ rating and Falcon Insurance Co. “A-“ financial strength rating on CreditWatch with negative implications, as the policyholder guarantee provided by its parent company no longer meets the guarantee criteria in paragraph 104 of S&P’s group rating methodology. S&P downgraded Rolta India (“Rolta”) to “B+” from “BB-“, reflecting S&P’s expectation that Rolta’s rising uncollected receivables and uncertain capital expenditure needs will push up leverage over the next 12 months. Outlook is stable
