

### Highlights

Global	<p>Risk appetite appears to be tapering into the end of this week, seen from a relatively flattish Wall Street and continued weakness in oil prices. Note that the West Texas Intermediate (WTI) has fallen below its \$50/bbl overnight, led by the sustained concerns over potential oversupplies by US shale oil production. Moreover, ECB kept its rates unchanged as widely expected with Mario Draghi iterating that “economic growth in the euro area is expected to be dampened by a sluggish pace of implementation of structural reforms”, although “ongoing economic expansion will continue to firm and broaden” while “the recovery in investment continues to be promoted by very favourable financing conditions and improvements in corporate profitability”. Elsewhere, US initial jobless claims printed higher than market expectation at 243k for the week ended 4<sup>th</sup> March, up from a 223k print seen in the previous week. For today, do watch for a slew of manufacturing production data from Europe (France, Italy and UK) and US nonfarm payrolls (est. 200K). In Asia, look for Singapore’s retail sales print, Thailand’s consumer confidence and a 10am constitutional court vote to determine Korea’s Park Guen Hye’s impeachment status.</p>
CH	<p>CPI decelerated to 0.8% yoy in Feb from 2.5% yoy in Jan. The deceleration was in line with market expectation due to base effect. However, the larger than expected deceleration was partially attributable to the decline of non-food prices, which fell by 0.1% mom. This suggests that the pass-through effect from higher PPI to CPI was not straightforward this time as the spike of PPI to 7.8% yoy in Feb was driven by supply-side factor.</p> <p>In addition, on-balance sheet credit expansion remained strong with new Yuan loan increasing by CNY1.17 trillion in Feb. However, off-balance sheet lending slowed due to window guidance as well as the impact of the upcoming macro prudential assessment. Aggregate social financing increased by CNY1.15 trillion.</p>
KR	<p>All eyes will be on a constitutional court ruling later at 10am in determining Park Guen Hye’s impeachment status. Should at least six members of the nine-member court (only eight remain after the chief justice retired in January) vote to impeach, Ms Park will be effectively removed from office. However, should the court fail to garner the required number of votes, Ms Park will be reinstated as President.</p>
Commodities	<p>A resurgence of US shale oil supply is threatening oil prices to trend lower. Specifically, energy giant Exxon Mobil had previously iterated its plans to commit \$5.5 billion (1/4 of its total spending budget) to shale drilling in US Texas and North Dakota earlier this week. Joining Exxon Mobil are other producers including Hess Corp, Chesapeake Energy Corp, Continental Resources Inc and others which detailed their growth plans that would result in a steady supply of crude supplies through the next decade. Still, note that US producers recognise the potential consequence of oversupplying the market, in which they iterated that they “have a great responsibility not to do so.” Note that WTI had fallen below its critical \$50/bbl overnight, while any further declines may lead Brent to test the same \$50/bbl handle soon. Elsewhere, gold futures broke its \$1,200/oz handle this morning, as we approach closer to the the US FOMC meeting next week.</p>

## Major Markets

- **US:** Equities reversed a three-day losing streak to end just marginally higher. Defensive stocks continued to be the main drag on the indices, but they were offset by gains in healthcare, financials and energy producers. Notably, energy producers gained for the first time this week as the decline in oil price was pared overnight. VIX maintained its recent uptrend, up 3.7% to 12.3. US Treasuries slumped ahead of non-farm payrolls tonight. Yields were pushed higher by 2-5 bps to year-to-date highs, with 2- and 10-year yields standing at 1.37% and 2.61% respectively. The markets seemed well-positioned for a strong data release tonight. Indirectly, this opens up the risk of reversal if non-farm payrolls or wages disappoint.
- **Singapore:** January's retail sales print will be released later this afternoon, where we pencil a 1.9% growth print.
- STI fell 0.84% yesterday, led by falls in Golden Agri (-2.6%), Jardine C&C (-2.5%) and DBS Group (-1.8%), though gains seen in Hutchison Port Holdings (+1.3%) and Thai Beverage (+1.1%) cushioned the decline. For today, the index is likely to consolidate lower given lower oil prices amid a relatively flattish overnight Wall Street.
- **Indonesia:** Bank Indonesia's Senior Deputy Governor, Mirza Adityaswara, signaled that the central bank is done with its easing moves, saying that the benchmark rate is "low enough". In an interview with Bloomberg, he also reportedly added that boosting growth is "not about interest rates anymore" and that BI continues to monitor the external factors and think that it has already cut enough. This view dovetails with our forecast that there will not be any more rate cut this year.
- **Malaysia:** PM Najib Razak said that North Korea has given assurance of Malaysian citizens' safety in that country. He added that two of 11 Malaysians stranded in North Korea, after the travel ban, were allowed to leave the country. He added that negotiations will continue and that diplomatic relations with North Korea will not be severed.
- **Thailand:** Prime Minister Prayut Chan-o-cha voiced the "need" to raise value-added-tax (VAT) rate to 8% (+1%), in order to generate more tax revenue to fund government projects.

## Bond Market Updates

- **Market Commentary:** The SGD swap curve bear-steepened yesterday, with swap rates trading 2-6bps higher across all tenors. In the broader dollar space, the spread on JACI IG corporates changed little at 192bps while the yield on JACI HY corporates rose 6bps to 6.78%. 10y UST yields continued its climb by 3bps to 2.59%, led by euro-zone bond markets after European Central Bank's (ECB) President Mario Draghi took a hawkish tone in yesterday's ECB meeting and said that "economic risks" are less pronounced.
- **New Issues:** Lenovo Group Ltd. priced a USD500mn 5-year bond at CT5+180bps, tightening from initial guidance of CT5+190bps. Top Wise Excellence Enterprise Co. priced a USD300mn 3-year bond (guaranteed by Kangde Xin Composite Material Group Co.) at 6%, tightening from initial guidance of 6.5%. The expected issue ratings are 'NR/Ba3/BB'. Asian Development bank priced a USD1bn 4-year bond at 3mL+5ps. The expected issue ratings are 'AAA/Aaa/AAA'. KWG Property Holding Ltd. priced a USD400mn 5.5NC3 bond at 6%, tightening from initial guidance of 6.125%. The expected issue ratings are 'B+/NR/BB-'. APT Pipelines Ltd. scheduled investor roadshows from March 13 for potential USD bond issuance.
- **Rating Changes:** S&P upgraded Sony Corp.'s (Sony) and its overseas subsidiary Sony Global Treasury Services PLC's corporate credit ratings and senior unsecured debt rating to 'BBB' from

'BBB-'. The outlook on the corporate credit ratings are stable. The ratings outlook reflects S&P's view that Sony's business restructurings and enhanced business portfolio management have greatly reduced downside risk to earnings in its volatile electronics business and have improved its operating efficiency. S&P raised the long-term local currency corporate credit rating on PT Astra International Tbk. (Astra) to 'BBB' from 'BBB-' and affirmed the 'BBB-' long-term foreign currency corporate credit rating. The rating actions reflect S&P's view that Astra's strengthened financial position should allow Astra to repay all debt in a sovereign stress scenario but that access to foreign exchange for non-sovereigns in Indonesia would be restricted by the sovereign, hence constraining the foreign currency corporate credit rating. The outlook on the local currency and foreign currency ratings is positive, reflecting the outlook on the sovereign credit ratings on Indonesia. Moody's affirmed Daikin Industries Ltd.'s (Daikin) 'A3' issuer rating and senior unsecured rating. In addition, Moody's revised the ratings outlook to positive from stable. The rating action reflects Daikin's improved profitability and Moody's expectation that the company's financial profile will remain strong for its 'A3' rating over the next 12-18 months. Moody's also expects leverage to stay around 2.0x, supported by solid cash flow generation, in the absence of material debt funded acquisitions. Fitch affirmed Australia-based retailer Wesfarmers Limited's 'BBB+' Issuer Default Rating (IDR) and senior unsecured rating, based on its leading market share, diversified earnings stream, and stable credit metrics. The outlook on the IDR is stable. At the same time, Fitch has chosen to withdraw the ratings of Wesfarmers for commercial reasons.
