

**Highlights**

Global	Trump's plan to add 10% or around US\$54b to beef up defense spending suggested one could almost overlook the weak durable goods orders data overnight. Durable goods orders rebounded 1.8% in Jan, but followed a downwardly revised 0.8% decline in Dec. Meanwhile, durable goods ex-transportation also unexpectedly fell 0.2%, albeit following an upwardly revised 0.9% gain in Dec. Fed's Kaplan also opined that the rate hike should happen "sooner rather than later" and "I would like to be aware of what's going on in the market, but I don't want to overread or overreact to it...market probabilities can change very rapidly". This prompted the 14-March FOMC meeting rate hike probabilities to rise further to 50%. Given strong hints from President Trump ahead of his address to Congress will be the key focus of markets. Expect Asian markets to trade on a slightly upbeat note on Trump hopes in the interim. Today's economic data calendar comprises of US' Chicago PMI, consumer confidence, wholesale inventories and Richmond Fed manufacturing index, Thai trade, and Singapore's credit card data.
US	Pending home sales unexpectedly fell 2.8% mom in Jan (+2.7% yoy), the largest dip since May to a one-year low of 106.4, dragged down by sales in the Midwest and West regions. The Dallas Fed manufacturing activity improved further from 22.1 to 24.5 in Feb.
EZ	Eurozone's consumer confidence was unchanged at -6.2 in Feb, but the economic sentiment gauge improved from 107.9 in Jan to 108.0 in Feb, suggesting that confidence remained resilient in 1Q17.
UK	The GfK household sentiment index fell in Feb and remained below zero for the tenth consecutive month amid reduced appetite for major purchases.
CH	China's currency regulator SAFE announced yesterday that it will allow all qualified foreign investors to participate in the onshore currency derivative markets to hedge their currency risk associated with their bond holdings. Meanwhile the SAFE also said that there is no requirement for prior approval for repatriation of funds as long as the outflow currency is the same as the inflow currency.
TH	Thailand's external conditions started on a good note this year, with custom exports growing at a better-than-expected rate of 8.8% (vs OCBC est of 8.4%). However, imports expanded at a slower pace of 5.2%, thus bringing trade balance to \$826 million.
SK	Manufacturer's confidence remained below its expansionary 100.0 mark in March, printing a mere 81.0 (vs Feb's 76). Korea's manufacturing industry has been facing challenging times, seen from the falling employment numbers in the manufacturing sector.
Commodities	Crude oil and gold prices were mostly unchanged in overnight reading, likely as market-watchers were awaiting President Trump's Congress speech tomorrow. Movements in soft commodities were significant however, seen from coffee (-3.7%) on news that Brazil had suspended a move to import coffee.

## Major Markets

- **US:** Equities continue the now commonplace story of setting record highs. Amongst the indices, Nasdaq led with a 0.28% gain, while the S&P 500 and Dow rose 0.10% and 0.08% respectively. However, there is increasing suspicion that the rally is losing steam, with the gains becoming smaller each day. Eyes will be on Trump's upcoming speech to Congress. For a further leg up in equities, Trump must not disappoint in terms of policy details. Otherwise, a consolidation may be in line. VIX hiked 5.4% to close at 12.09. Meanwhile, US Treasury yields were higher by 5-6 bps across the board as market-implied odds for a March hike jumped to 50%. 2- and 10-year benchmark yields stood at 1.19% and 2.37% respectively. The movement of the market-implied odds, which stood at 40% last Friday, suggests that the market could not get a good grip of Fed's intent and is uncertain of the March FOMC.
- **Singapore:** Positive overnight cues from Wall Street is likely to lend the STI a helping hand today after it lost 0.27% to close down at 3108.62 yesterday. STI's support and resistance are tipped at 3080 and 3120. After the SGS bond yield curve flattened yesterday, we expect SGS yields to likely track UST bond yields higher amid investor optimism that president Trump would spend "big" on infrastructure.
- **Hong Kong:** Exports and imports retreated 1.2% yoy and 2.7% yoy respectively in January. As a result, trade deficit narrowed to HKD12.3 billion. Specifically, overseas shipments to major Asian trading partners, including Mainland China, Vietnam, Philippines and Japan, all dropped. In comparison, exports to western countries like Germany and the USA reversed the downward trend. On the other hand, subdued domestic demand outweighed higher commodity prices in dragging down imports. However, the effect of the Lunar New Year Holiday might have distorted the trade figures. Therefore, we are waiting for February's trade data to have a clear picture of HK's trade sector. Looking ahead, on the back of its fiscal stimulus, any improvement in the US economy will be favorable to HK's trade sector. However, the rise of protectionism and a stronger HKD may have a negative effect on the sector.
- **Macau:** Unemployment rate rose slightly to 2.0% in the three months through January after remaining static at 1.9% for 17 consecutive months. Due to the increased visitor arrivals and China's stabilization, total visitor expenditure rose for the second straight quarter, up 13.3% yoy in 4Q. As a result, retail sales value marked its positive gain for the first time since 2Q 2014. The advancement in the retail sector underpinned hiring sentiments. The same is true to the gaming sector after its labor redundancy was eliminated. However, a stronger MOP and policy risks may hit the gaming and retail sectors. Furthermore, as there is only one hotel project scheduled to be completed this year, labor demand in the construction as well as for the hotel, restaurant and similar sectors have been decreasing. Nevertheless, tight labor supply will still warrant a resilient labor market. We expect unemployment rate to stabilize around 2% throughout 2017 with wage growth stagnating for a longer period due to uncertain outlook at home and abroad.

## Bond Market Updates

- **Market Commentary:** The SGD swap curve traded downwards yesterday, with swap rates trading 1-3bps lower across all tenors. In the broader dollar space, the spread on JACI IG corporates remained stable at 193bps while the yield on JACI HY corporates fell 3bps to 6.66%. 10y UST yields rose 6bps to 2.37%, as Federal Reserve's Robert Kaplan reiterated his view that accommodation should be removed gradually and patiently without mentioning the March 15 meeting.
- **New Issues:** Westpac Banking Corp priced a USD3.25bn 3-tranche deal; with the USD1.65bn 3-year tranche priced at CT3+72bps, tightening from initial guidance of around CT3+85bps; the

USD600mn 3-year tranche priced at 3mL+43bps; and the USD1bn 10-year tranche at CT10+100bps, tightening from initial guidance of CT10+120bps. The expected issue ratings are 'AA-/Aa2/NR'. China Development Bank (Hong Kong Branch) priced a USD2bn 2-tranche deal; with the USD850mn 3-year tranche at 3mL+55bps, tightening from initial guidance of 3mL+75bps; and the USD1.15bn 5-year tranche at 3mL+70bps, tightening from initial guidance of around 3mL+95bps. The expected issue ratings are 'AA-/Aa3/NR'. Hyundai Capital Services Inc priced a USD600mn 5-year bond at CT5+125bps, tightening from initial guidance of CT5+145bps. The expected issue ratings are 'A-/Baa1/NR'. Sumitomo Mitsui Trust Bank priced a USD1.5bn 2-tranche deal; with the USD1bn 2-year tranche at CT2+87.5bps, tightening from initial guidance of CT2+105bps; and the USD500mn 2-year tranche at 3mL+51bps. The expected issue ratings are 'A/A1/NR'. Republic of Indonesia scheduled investor meetings from 6 March for a potential USD bond issuance. Pacific Century Premium Developments Ltd. scheduled investor meetings for a potential USD bond issuance. China Reinsurance Co Ltd. scheduled investor roadshows from 27 February for a potential USD bond issuance. China Cinda Asset Management Co. Ltd. scheduled investor roadshows from 28 February – 1 March for a potential USD bond issuance. The potential bond issues will be issued by China Cinda Finance (2017) I Ltd., and guaranteed by China Cinda (HK) Holdings Co. Ltd. The expected issue ratings are 'A-/Baa1/A'.

- **Rating Changes:** Moody's affirmed Takeda Pharmaceutical Company Limited's (Takeda) 'A1' issuer and senior unsecured ratings. The rating outlook is negative. The rating confirmation and negative outlook primarily reflect the company's weakened financial metrics following the acquisition of ARIAD Pharmaceutical Inc., which will add up to USD3.5bn of additional debt to Takeda's balance sheet. On the other hand, S&P downgraded its corporate credit and unsecured debt ratings on Takeda, to 'A-' from 'A+'. In addition, S&P removed Takeda's ratings from CreditWatch, and placed the ratings outlook on negative. Moody's upgraded the senior unsecured ratings of all rated entities within the Rio Tinto Group (Rio Tinto) to 'A3' from 'Baa1'. The rating outlook is stable. The rating upgrade reflects Moody's view that actions undertaken by Rio Tinto over the course of 2016, including its 1) cost reduction achievements, 2) debt reduction through its liability management program, 3) divestitures of non-core assets, and 4) focus on cash generation, which included a change in its dividend policy, have better positioned Rio Tinto to withstand the increased volatility in the markets in which it participates.

This publication should not be construed as an offer or solicitation for the subscription, purchase or sale of the securities/instruments mentioned herein. Any forecast on the economy, stock market, bond market and economic trends of the markets provided is not necessarily indicative of the future or likely performance of the securities/instruments. Whilst the information contained herein has been compiled from sources believed to be reliable and we have taken all reasonable care to ensure that the information contained in this publication is not untrue or misleading at the time of publication, we cannot guarantee and we make no representation as to its accuracy or completeness, and you should not act on it without first independently verifying its contents. The securities/instruments mentioned in this publication may not be suitable for investment by all investors. Any opinion or estimate contained in this report is subject to change without notice. We have not given any consideration to and we have not made any investigation of the investment objectives, financial situation or particular needs of the recipient or any class of persons, and accordingly, no warranty whatsoever is given and no liability whatsoever is accepted for any loss arising whether directly or indirectly as a result of the recipient or any class of persons acting on such information or opinion or estimate. This publication may cover a wide range of topics and is not intended to be a comprehensive study or to provide any recommendation or advice on personal investing or financial planning. Accordingly, they should not be relied on or treated as a substitute for specific advice concerning individual situations. Please seek advice from a financial adviser regarding the suitability of any investment product taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. OCBC and/or its related and affiliated corporations may at any time make markets in the securities/instruments mentioned in this publication and together with their respective directors and officers, may have or take positions in the securities/instruments mentioned in this publication and may be engaged in purchasing or selling the same for themselves or their clients, and may also perform or seek to perform broking and other investment or securities-related services for the corporations whose securities are mentioned in this publication as well as other parties generally.
