Property exposure – resilient portfolios

Singapore Development Project Loans

- Average LTVs are 54% for residential projects and 59% for commercial projects; only 2% of the book has LTV of more than 80%
- Diversified portfolio with about 70% residential and 30% commercial
- Development project financing accounts for less than 50% of Singapore real estate-related loans (excluding housing loans)*
- Underwriting standards have been disciplined and conservative; we have avoided speculative projects
- Bulk of exposure is to large developers with long standing relationships and strong financials
- Stress tests show the portfolio can withstand significant price declines

Singapore Housing Loans

- 81% owner-occupied
- Average LTV < 60%; 12% of the book has LTV of more than 80%
- Negative equity 0.7%

** Other real estate-related loans are mainly secured by completed income-producing assets with stable cash flow and low LTVs*

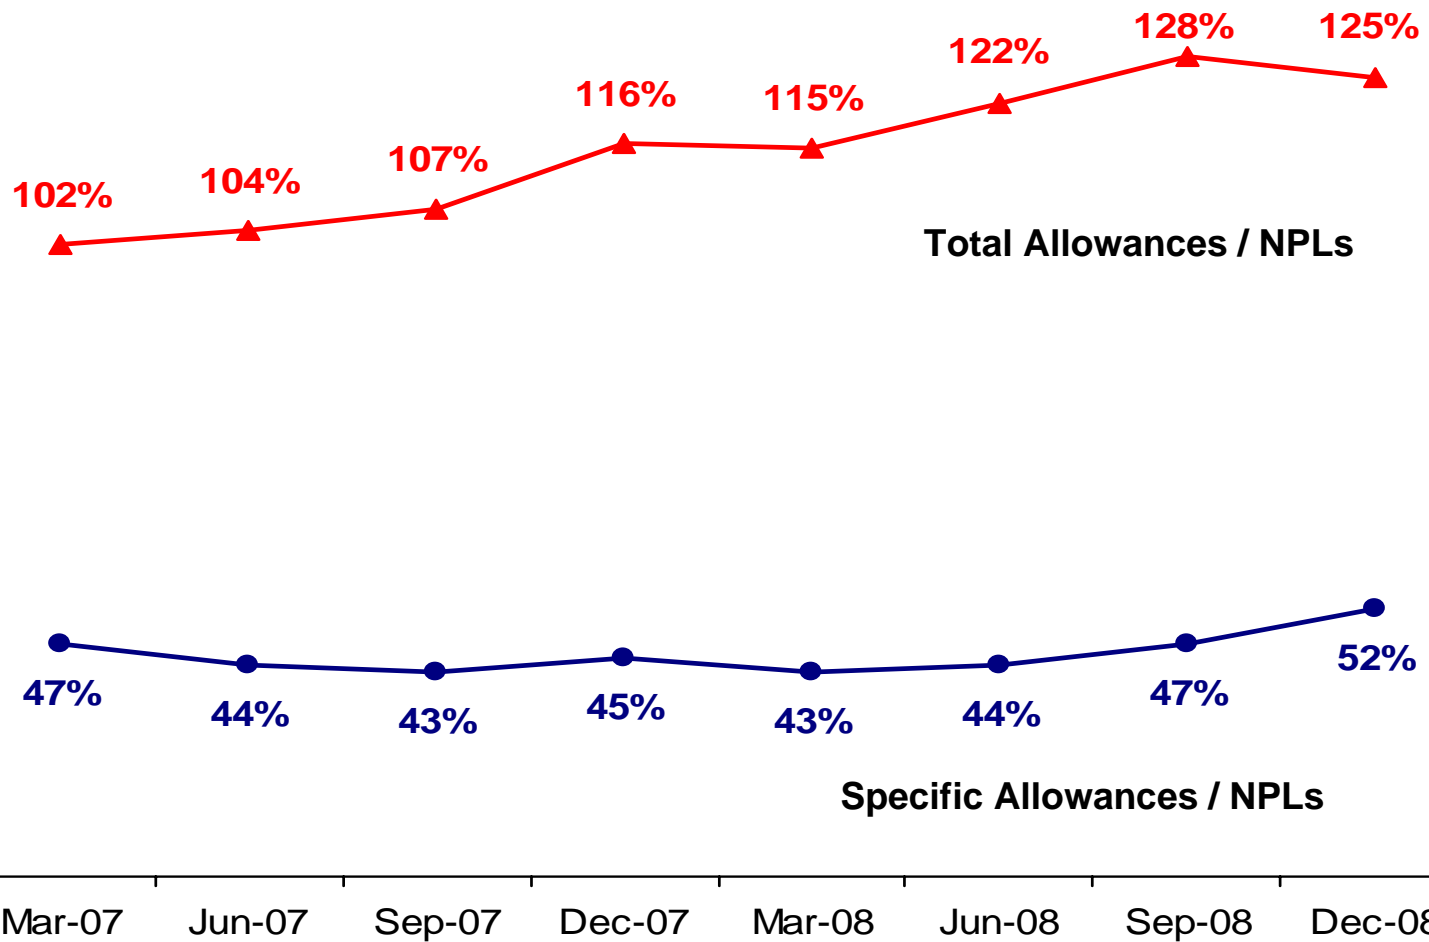

Deposits up 6% YoY; better mix with higher proportion of lower-cost deposits

NPL ratio increased in 4Q08 but remains lower than end-2007

Allowance coverage at 125%

Scrip dividend scheme to be reactivated

- Shareholders can elect to receive FY08 final dividend in shares instead of cash
- Scheme was previously approved by shareholders in 1996 – to be updated in line with current SGX scrip dividend rules
- Issue price for scrip to be set at a 10% discount to reference share price (average price from ex-dividend date to books closure date)
- Discount is within the limit allowed under Listing Manual rules
- Scrip option provides shareholders with a convenient way to re-invest dividends in OCBC shares with minimal transaction costs
