^{1/} Expected credit losses according to the Thai Financial Reporting Standard No.9 - Financial Instruments

^{2/} Ratio of CET1 available after meeting the commercial bank's minimum capital requirements is not necessarily equal to the difference between the CET1 ratio (Item 5) and the minimum CET1 ratio requirement of 4.5% since the CET1 ratio may be attributable to the minimum tier 1 ratio requirement of 6% and/or the minimum total capital ratio requirement of 8.5%. **Example:** If a bank has RWA = 100, CET1 = 10, AT1 = 1.5 and T2 = 0, the bank's CET1 is therefore used for maintaining the total capital ratio of 8.5%, then the

Accompanying narrative

Impairment of financial assets

Impairment allowances for financial assets are assessed using a forward-looking expected credit loss ("ECL") model in accordance with the requirements of TFRS 9.

Scope

Under TFRS 9, the ECL model is applied to debt financial assets measured at amortised cost or FVOCI and most off-balance sheet loan commitments and financial guarantees

Expected Credit Loss Impairment Model

Under TFRS 9, credit loss allowances are measured on each reporting date according to a three-stage expected credit loss impairment model:

- Stage 1 - On initial recognition, expected credit loss will be that resulting from default events that are possible over the next 12 months
- Stage 2 - Following a significant increase in credit risk of the financial assets since its initial recognition, the credit loss allowance will be that resulting from default events that are possible over the expected life of the asset.
- Stage 3 - When a financial asset exhibits objective evidence of impairment and is considered to be credit-impaired, the credit loss allowance will be the full lifetime expected credit loss.
