
OCBC Group Leverage Ratio As at 30 June 2015

	30-Jun-15	31-Mar-15
Capital and Total exposures (S\$m)		
Tier 1 capital	27,181	26,656
Total exposures	363,935	368,544
Leverage Ratio (%)		
Leverage ratio	7.4	7.2

The Leverage ratio increased due to improved Tier 1 capital and the reduction in total exposures. Tier 1 capital was higher with new shares issued under the Scrip Dividend Scheme while the drop in total exposures was mainly due to decrease in money market placements, derivative exposures and off-balance sheet items.
